

LEGAL INTELLIGENCE & DUE DILIGENCE

SecondLayer Know Everything Before You Act

Two AI platforms. One mission. Legal analytics over 120M+ court records and global due diligence across sanctions, Dark Web, and corporate registries.

The Problem

01

Days of Manual Legal Research

Lawyers spend 2-3 full days digging through court records. Legacy Ukrainian tools from the 2000s offer no AI, no semantic search, no analytics.

02

Due Diligence is Broken

Checking a counterparty means 10+ separate databases: sanctions, registries, offshore leaks, media, breach databases. No one tool connects them all.

03

Hidden Risks Destroy Deals

Sanctions violations cost millions. Undisclosed beneficial owners, offshore structures, compromised credentials, negative media — all discoverable, none automatically flagged.

04

Fragmented Intelligence

Court decisions, parliament data, business registries, sanctions lists, Dark Web leaks — scattered across dozens of systems with no unified interface.

Two Platforms, One Intelligence Stack

LEX

AI Legal Analytics

The AI layer over Ukrainian legal data. Semantic search across 120M+ court decisions, judge analytics, citation verification, defense strategy generation, legislation monitoring. 118 MCP AI tools.

Semantic Search

Judge Analytics

Citation Verification

118 MCP Tools

Panoptic

Due Diligence & Threat Intelligence

Global counterparty screening in seconds. Sanctions (4M+ entities), offshore leaks (ICIJ), beneficial ownership chains, Dark Web credential checks (15B+ records), media intelligence, cyber threat analysis.

Sanctions Screening

Dark Web Intel

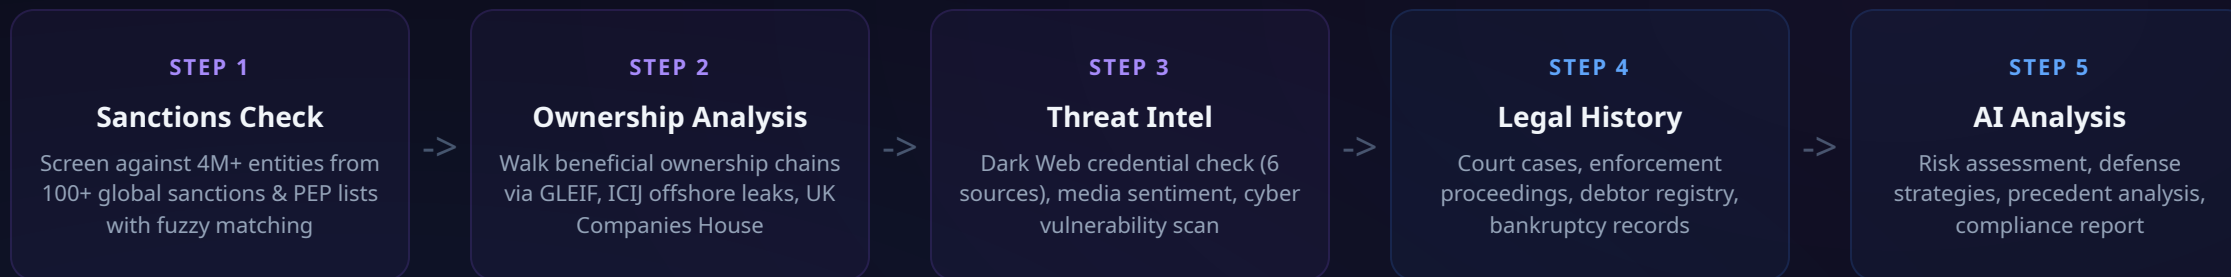

Ownership Chains

Threat Analysis

panoptic.com.ua

Together: the only platform that connects **legal case analysis** with **global risk intelligence**

The Complete Due Diligence Pipeline

USE CASE: M&A DUE DILIGENCE

12+ databases checked in one query

<30s full counterparty screening

Sanctions + offshore + media + court history + enforcement — unified risk score for any entity globally.

USE CASE: LEGAL CASE RESEARCH

473 documents analyzed

15 min vs. 1 week manually

11-year-old debt case (UAH 11.9M). AI identified 9 defense strategies across multiple registries.

Combined Data Moat

Technology Architecture

LEX BACKEND

MCP Backend

Court cases, documents, semantic search, AI analysis, billing, consultations.

MCP Rada + MCP OpenReyestr

Parliament data, business registries, beneficiaries, debtors.

PANOPTIC BACKEND

Intelligence Pipeline

FastAPI async engine. Parallel queries to 12+ sources in <200ms.

Tor Fleet + OpenSanctions

100+ containerized Tor instances + self-hosted sanctions screening via Elasticsearch.

Unified Gateway

Single API aggregating all services. Blue-green production deployment.

TECH STACK

- TypeScript / Node.js 20 (LEX)
- Python / FastAPI (Panoptic)
- PostgreSQL + Qdrant + Redis
- Elasticsearch + DuckDB + SQLite
- OpenAI GPT-4o + Embeddings
- React 19 + Vite + TailwindCSS
- Tor Fleet + HAProxy
- MCP Protocol (Model Context Protocol)
- Docker + Blue-Green Deploy + CI/CD
- Diia Digital Identity Integration

LLM Training Vision

Building a **Harvey-class legal AI model** for Ukrainian law. Three-phase roadmap using open-weight models (DeepSeek-V3 685B) on cloud infrastructure, trained on the largest open court corpus in Europe.

PHASE 1: FOUNDATION

Fine-tune embeddings + LoRA on 10.9M KUpAP decisions. Target: >75% preference vs GPT-4o.

Budget: ~\$15K

PHASE 2: SCALE

Continued pre-training on 100M decisions (50-80B tokens). Jurisdiction-specific LoRA adapters.

Budget: ~\$80-120K

PHASE 3: HARVEY-CLASS

Multi-model orchestration, RLHF with lawyers. Target: >95% preference, <0.2% hallucination.

Budget: ~\$100-130K

Constitutional RLHF

DeepSeek-V3 685B

Long Tail Mitigation

Calibrated Uncertainty

CONSTITUTIONAL RLHF

Ukraine's Constitution as reward signal. Each response evaluated against constitutional principles: presumption of innocence, privacy, equality, human dignity.

30-article LegalTech LLM Constitution published as open industry standard.

KEY INNOVATION

Harvey.ai spent \$100M+ training with OpenAI. We achieve comparable results at a fraction of cost using open-weight models on cloud silicon — focused on a unique dataset no competitor can replicate.

Market Opportunity

TAM
\$1.2B+

SAM
\$120M

SOM
\$8M

TAM — Legal AI + RegTech

Global legal AI market (**\$500M+**) combined with regulatory technology and due diligence (**\$700M+**). Two fast-growing markets converging.

SAM — Ukraine, CEE & Compliance

Legal tech spending in Ukraine/CEE (**\$50M**) plus KYC/AML compliance market for companies operating in the region (**\$70M**).

SOM — Realistic 2-Year Target

\$5M ARR from LEX (legal professionals) + **\$3M ARR** from Panoptic (compliance teams, banks, law firms doing international DD).

Zero Direct Competitors

No platform combines **AI legal analytics + global due diligence** in one stack. Competitors are either legal-only or compliance-only.

Business Model

LEX INDIVIDUAL \$29/mo Solo lawyers. Full access to court search, AI analysis, judge analytics, legislation monitoring.	LEX + PANOPTIC BUNDLE \$149+/mo Law firms & corporate legal. Complete legal analytics + due diligence intelligence. Multi-user access.	API / ENTERPRISE Custom Pay-per-query API. On-premise deployment. White-label for banks, fintech, compliance platforms.

PLATFORMS IN PUBLIC BETA

6

RESEARCH PAPERS (ARXIV)

MONTHS 1-2

Domain-specific LLM v1. Fine-tune on 120M court decisions. Benchmark vs GPT-4o on Ukrainian legal tasks. First paid beta cohort.

MONTHS 3-4

NVIDIA Inception marketplace listing. LLM API available for law firms and compliance platforms. First enterprise pilots.

MONTHS 5-6

\$15-25K MRR from LLM API + platform subs. Seed round preparation. Expand to CEE jurisdictions.

The Team

VO

Volodymyr Ovcharov

Founder, CEO & AI Researcher

15+ years building scalable data platforms. Glushkov Institute of Cybernetics (NAS of Ukraine). AI/ML, LLM training, high-load systems, OSINT infrastructure.

IK

Igor Kyrychenko

Co-Founder & CLO (Chief Legal Officer)

PhD in Law. Deep expertise in Ukrainian and international legal practice. Legal domain modeling, annotation quality, compliance strategy.

Domain Expertise

Legal PhD + AI researcher CEO. Domain logic baked into architecture, not bolted on.

Dual Data Moat

120M+ legal records + 15B+ intelligence records. Months to build. Impossible to replicate quickly.

Two Markets, One Team

Legal analytics + due diligence. Natural cross-sell. Shared infrastructure. Double the addressable market.
